

# At The WHITE HOUSE Tuesday

## Fur Sale Continued

### Takes in Three Producing Wells, While at Fourth Tools Are Fished For.

Frank Pickrell, who has returned to El Paso for a few days visit from the oil fields, where he has been for the past three months, stated that the Texas Oil and Gas Co., of which Haysen Krupp, Mr. Pickrell, John St. Wright, J. Myron Murphy of New York, and Elias G. Krupp are officers, has purchased the entire block 28 of Burkhardt township, containing four wells, three of which are producing an average of 110 barrels each daily and at the fourth drillers are fishing for a lost tool, which they hope to recover sometime and complete the well, and five acres comprising lot 28 in block 28, situated about 2,000 feet north of the Texas Chief, the biggest producer in the field with one exception.

The Olsen-Davis well located about 150 yards southeast of the Texas Chief, was brought in a few days ago, flowing about 500 barrels daily. Mr. Pickrell stated that the Olsen-Davis well is the western offset to the Jewel V, which was reported to be dry, but is now reported to be a "limbered" well. It is said that Joe Art. Hammond and two or three other operators in the field have taken a 50-50 drilling contract with the Jewel V Co. and will move the derrick over to it in 12 feet and drill another hole.

The Olsen-Davis well, about 500 feet west of the Olsen-Davis well, is now flowing about 4,000 barrels daily, according to Mr. Pickrell, who added that the Burk Fox well, now on the sand waiting for pipe line connections in the north, is producing about 100 barrels daily. The Olsen-Davis well, in block 28, is creating considerable activity in that part of the field, it being by far the northernmost point northwest a which the sand has so far been struck. The Falcon well, southwest of the Burk Fox, in block 28, also has casing set and waiting for pipe line connections, and Waukita No. 2, just south of the Falcon, was preparing to bring their well in the day Mr. Pickrell left.

The Sinclair Gulf well in the northern part of the Lucinda Meadows tract and the Fisher-Gilliland well in the west central part of the same tract are also on the sand, he said, and being prepared to be brought in when connections can be made. The Sinclair Gulf well is the furthest extension to the field on the north and the Fisher-Gilliland well, further west, extending the field over half a mile to the west.

On the Olsen-Davis well, in block 28, Mr. Pickrell stated that the company has a 50-50 drilling contract for two wells, one of which was started several days ago, with the Oklahoma Petroleum and Gasoline Co., having a refining plant at Canton, across the river from block 28, owning its own pipe line, etc., which assures immediate pipeline connections.

Cartles & Co., buy Liberty Bonds.—Adv.

### FOOT'S FOUGHT GETS SBOGG

Is now 72 but feels well and strong since Tanlac ended trouble.

"I am now seventy-two years of age and during all those years I have never run across a medicine that I consider in the world with Tanlac," said W. H. H. Fouts, the northernmost point northwest a which the sand has so far been struck. My stomach was in such a condition that I could hardly retain anything I would eat and I would suffer like blazes with cramps and pains all through me. My heart would jump and palpitate so on account of the gas in my stomach that I feared I had heart trouble. At night I would almost smother and have to get right out of bed and breathe like I would never be able to draw another good, free breath.

"Way before I got this Tanlac I had not been able to get a good night's rest in so long that I can hardly remember the time. I have had such awful rheumatic pains in my legs and such a drawing on my muscles that many a night I would just have to get up and walk around the room trying to get relief. But all is quite different with me now. A few weeks back I began taking Tanlac and now I am in as good shape as anyone could wish to be. Why, I feel as well as I did twenty-five years ago, when I was handling big building contracts, and I honestly believe I could go right out now and handle a big job as I ever did and put it over with my same old time vigor. My stomach never bothers me any more and I never have a rheumatic pain or ache of any kind and I sleep like a log every night. In fact, I am feeling so strong and well that I have a mind to start building. I tell you a medicine that will fix a man of my age up sound and well, after he had suffered so long, is bound to be unusual. There is no word of praise too good for Tanlac."

Tanlac is sold in El Paso by Kelly & Pollard and by the leading druggists in practically every city, town and village in America.—Adv.

### Full-O-Pep Scratch Feed—

Full-O-Pep Growing Mash. Full-O-Pep Dry Mash. Pansy Scratch Feed. Pansy Baby Chick Feed. Manufactured by The Quaker Oats Co.

We will hereafter carry a full line of these well known Ponty Feeds. A trial pack will convince you of their value.

HEID BROS., Inc. MEAT, GRAIN, FUEL, AND BUILDING MATERIAL. Phone 28. Texas & Dallas Sts.

### Hamie Well Opens Up New Field With 900 Barrel Production.

Eastland, Texas, Sept. 1.—Four miles northwest of Dendemon, the Hamie well, on the Lewis tract, is producing 900 barrels of oil while in an incomplete state. The well began producing at a depth of 2,944 feet a few days ago after the drillers had fished out the casing, which was lost in the hole more than six months ago. This well is four miles from the nearest production and opens up a new field. It supports the theory that the trend of production is toward Eastland. The oil flow is under control and the well is shut down pending the connection of pipe lines and the placing of sufficient flow tanks.

The Hercules Oil company has a showing of oil and gas in its offer to the well it brought in a few weeks ago in partnership with the Huesco Oil company on the Solomon tract, situated eight miles north of Eastland. The test is now at a depth of 1,850 feet and the drillers believe that it will become a good well when completed. The well brought in some time ago by the two companies in making 1,000 barrels of oil from formation encountered at a depth of 1,835 feet.

A showing of gas has been found in a hard sandy limestone foundation at a depth of 3,500 feet in the Caldwell tract, three miles west of Eastland. The Eclipse Oil company is being delayed in completing its well on the Eastland tract, which came in with production a few days ago at a depth of 2,523 feet, by the loss of a string of casing.

The Jackson Oil company is setting the six inch casing at a depth of 2,800 feet in its test on the Cookin' tract, three miles east of here. There is a showing of both oil and gas at this depth.

Three miles south of Eastland the Arkansas Natural Gas company well on the C. C. Connolly property was increased its flow to 250 barrels per day. The operators believe that the well will produce 500 barrels the next few days. The No. 2 is rising up.

The six inch casing is being set at a depth of 3,345 feet in the Empire Oil and Fuel company's well on the Peapack tract, three and a half miles north of Eastland. A showing of gas and oil was found at this depth a few days ago.

On the Roe tract, the Mook well is six feet in the gray lime at 2,515 feet, with a good showing of gas and oil.

The Jones Oil company will shoot their well on the Olsen schoolhouse lot at 2,550 feet as soon as it is plugged back to that depth.

The Hivick well, on the Sna tract, is trying to pull the casing from the well.

In the Dendemon field, the No. 1 Anderson, of Skelly & Sanker, is two feet in the sand at a depth of 2,812 feet and is spraying 200 barrels of oil per day.

In this same field the Magnolia Petroleum company's McArthur well is four feet further in the sand and the production has increased to 400 barrels per day. At a depth of 2,724 feet with the drill one foot in the sand the well was producing 60 barrels of oil. The well will be carried deeper in the hope of bringing in a large gusher.

Company Prepares to Drive Drills 5000 Feet in New Territory.

Midland, Texas, Sept. 1.—The States Oil corporation is greatly interested in the prospects for oil in Midland county, as is shown by the fact that it has secured leases on a large number of acres in the vicinity of Midland. Here the company is planning to sink the deepest test for oil on the plains. The company will drill to a depth of 5,000 feet unless oil is paying quantities should be found at a lesser depth. This company is drilling nine miles south of here with the very latest standard rigs and tools.

The Prudential Security company of Houston has three standard rigs ready to start drilling in Howard and Glasscock counties, east of Midland. This company with the General Oil company of Big Spring, will have about 25 drills running by January 1.

McIntosh county has a 50 barrel well in the Barbara Oil company's second completion on the Patton property, the northwest quarter of section 2-12-14, Broken Arrow district, Tulsa county.

On the Kinkead land, in the southwest quarter of section 4-28-10, Cotton county, the Majors Oil company is working their well for 200 barrels per day.

The McMan Oil company's second completion on the Carr land, in the northwest quarter of section 4-28-10, Cotton county, is making 40 barrels of oil per day.

The first completion on the Sallie Donaldson land, in section 12-18-11, in the Jenkins district, Tulsa county, is making 15,000 cubic feet of gas. This test was drilled by Devere Brothers.

The Barnard Oil company's second completion on lot 179, in the northwest quarter of section 25-11, Osage county, is making 125 barrels of oil daily.

C. G. Tibbels has a 20 barrel well at a depth of 1,281 feet in its test on the William Clayton property, in section 4-17-12, Tulsa county.

C. G. Tibbels has a 20 barrel well at a depth of 1,281 feet in its test on the William Clayton property, in section 4-17-12, Tulsa county.

### Drills in Pecos County REACH DEPTH OF 3100 FEET

Port Stockton, Texas, Sept. 1.—Oil operators have been practically assured that oil will be found in Pecos county and as a result activity in oil operations is very keen. For a number of months two standard rigs have been drilling in the eastern part of the county, both of which are now around a depth of 2100 feet, in spite of the many delays which have, to a great extent, hindered progress.

The formation in which these two wells are now drilling bears indications of both oil and gas. Already good showings for oil have been encountered at various depths in both wells.

On the Harrell ranch, location the derrick is completed and is being rigged up. Machinery is being placed. Operations will begin very soon.

For the past three months very little progress has been made in the Kelly acreage company's well, owing to artesian water flow. Every attempt is being made to stop this flow, but with failure. The drillers state that the oil showing at the present depth is very promising and in spite of the water trouble drilling will be resumed at once.

Drilling has been stopped on the C. R. Monroe well at a depth of 1,650 feet, pending the arrival of a sand line, which is expected to arrive in a day or so. At a depth of a little more than 1,000 an oil bearing sand was penetrated last week and it is generally thought that this well is a near completion. However, should the sand not carry sufficient paying oil the well will be abandoned and it will be the deepest dry test well of the Pecos. This well is still drilling with the ten inch bit.

Material has been received at the H. L. Kerkman ranch for a test which will be sunk at once.

### PLAN TO DEVELOP ACREAGE IN RUNNELS COUNTY, TEXAS

The Weston Krupp Oil interests, composed of men of Salt Lake City, El Paso and Fort Worth, plan the development of 10,000 acres in Runnels county, in the Ranger field and in block 42, in the northern part of the county, according to F. E. Krupp, local representative, and E. L. Weston, of Salt Lake City, who is in charge of the project. Mr. Weston is general manager of the Nebraska Utah Potash company, which is mining and refining potash at Marysville, Utah.

The Weston Krupp company is drilling one well near Winters, Texas, in block 42, in the northern part of the county, and is planning to put in a rotary rig to drill in the Burkhardt's holdings.

Mr. Weston estimates that his pay will be struck at 3,500 feet in Runnels county. He also has a rotary rig in the Callahan county field.

### SEEK SHALLOW POOL IN EASTLAND FIELD

The Hercules Petroleum company's Holloman No. 1 well, which is an offset to the Huesco Ranger well is being drilled under a 50-50 lease, as possible further proof of that shallow pool in the Eastland field, according to the Hercules Petroleum company.

The Hercules Petroleum company is drilling one well near Winters, Texas, in block 42, in the northern part of the county, and is planning to put in a rotary rig to drill in the Burkhardt's holdings.

### Oklahoma Field Continues to Bring Producers and Big Gassers.

Tulsa, Okla., Sept. 1.—The following wells have recently been completed in the Oklahoma oil field: The Minnabasca Oil company has a 2,000-cubic foot gasser in its fourth test on the Mullendore land, in the northwest quarter of section 24-21-7, Jennings district. This well is at a depth of 2,172 feet and is showing some oil.

McIntosh county has a 50 barrel well in the Barbara Oil company's second completion on the Patton property, the northwest quarter of section 2-12-14, Broken Arrow district, Tulsa county.

On the Kinkead land, in the southwest quarter of section 4-28-10, Cotton county, the Majors Oil company is working their well for 200 barrels per day.

The McMan Oil company's second completion on the Carr land, in the northwest quarter of section 4-28-10, Cotton county, is making 40 barrels of oil per day.

The first completion on the Sallie Donaldson land, in section 12-18-11, in the Jenkins district, Tulsa county, is making 15,000 cubic feet of gas. This test was drilled by Devere Brothers.

The Barnard Oil company's second completion on lot 179, in the northwest quarter of section 25-11, Osage county, is making 125 barrels of oil daily.

C. G. Tibbels has a 20 barrel well at a depth of 1,281 feet in its test on the William Clayton property, in section 4-17-12, Tulsa county.

### ESTIMATES U. S. HAS OIL TO LAST ONLY 20 YEARS

Washington, D. C., Sept. 1.—Launching into a fourth attack on the land leasing bill, senator La Follette, Republican, Wisconsin, criticized especially the provision authorizing the granting of 20 year term leases for oil lands, declaring that according to estimates the country's oil supply will have been exhausted in 20 years.

Upon the motion of senator Jones, New Mexico, the senate adopted an amendment by which persons who are now working locations on oil land, but who have not yet discovered oil, would be permitted to continue to operate without being required to take out prospecting permits. The amendment resulted from protests from New Mexico.

The proposed amendment would result in great financial loss to prospectors.

### MESA OIL AND GAS COMPANY FILES CHARTER AT SANTA FE

Santa Fe, N. M., Sept. 1.—The Mesa Oil & Gas company is a Portland, Ore., corporation that has filed its charter. The incorporators are A. L. Greco, A. M. Mead, E. B. Hawkins, A. J. Fort, and the capital stock is \$100,000.

### WILL HOLD CONFERENCE ON SAFETY FIRST PLAN

Plans for the observance of a nation wide no-accident campaign will be formulated at a meeting of the safety conference.

The United States railway administration, which will convene in the Brown Palace at Denver, beginning Monday, September 1, L. M. Trimble, safety superintendent for the El Paso and Southern railway, made this announcement Saturday afternoon, leaving for Denver to attend the conference. It is proposed to have the campaign during the period from October 15 to October 31.

Lawn Mowers sharpened. Allen Arms & Cycle Co., 404 N. Oregon St.—Adv.

### LACK A CIRCUIT JUDGE TO TRY POOLHALL CASE

Austin, Texas, Sept. 1.—Unless a new circuit judge is appointed within the next few days to succeed Judge R. L. Batts, resigned, it will be necessary to defer the trial of the state poolhall case, said assistance attorney general W. J. Townsend, who has charge of this litigation. The case is set for September 10, at Dallas, and the state is anxious and ready for trial. It is provided that the case shall be heard by three judges, two United States district judges and one circuit judge, and without the latter it will be impossible to proceed with the case.

Notice—Dr. J. A. Barrett, residence 2814 N. 10th, omitted from July directory.—Adv.

### EXPECTING 1,500 PERSONS TO ATTEND LABOR DAY BALL

More than 100 tickets have been sold to the annual Labor day ball which will be given tonight at Liberty hall for the benefit of the Labor temple fund. Each ticket admits a man and a woman, and H. M. Walter,
